

100% GREEN OAK FRAME GARAGE KIT

E01. Gazebo. 4mt sq 150mm uprights

CAD DRAWING
OF THE OAK KIT

All buildings are designed using traditional joints. Green oak is a natural product and may shrink, warp and or have natural defects and tannin stains. Kits need to be erected with 7 days of delivery by a professional carpenter and natural movements may require adjustments to fit. Large timber screws are to be used to joint areas to strengthen traditional joints.

Raison Bois et Débits have no responsibility for the timber after delivery and hold the right to make modifications to the design at any time prior to delivery. It is also the responsibility of the customer to ensure they have obtained correct planning permission and/or building control consent. Kits should be stored in a dry area and not in direct sunlight.

E&EO

A beautiful and useful feature of any garden, our gazebos are made from the highest quality European Green oak and precision engineered using traditional joints.

Designed for quick assembly with traditional oak pegs, the kit comes together to form an impressive and picturesque oak framed gazebo.

The standard gazebo specifications are listed below, however, should your requirements differ, our kits can easily be customized to any shape and size.

All kits are cut on demand. Cladding, roofing materials saddle stones and brickwork not included. Cladding options available upon request.
